Brand Statement

I am a full stack web developer with a passion for creative problem solving on both the front end and the back end. I have over 5 years of people leadership with a focus on developing an environment of trust where the team feels comfortable experimenting together and iterating quickly. I earned my certification in web development from the University of Richmond, where I have honed my skills in HTML/CSS, JavaScript, and the full MERN stack. By combining this with my major in Psychology and minor in Philosophy I am able to understand how clients and users think and ensure that both sides are able to better understand each other to achieve optimal outcomes.

Coding

HTML	SQL
CSS	MongoDB
JavaScript	Express
Node	React

Skills and Abilities

Analytical thinker	Make decisions grounded in data
Creative problem solver	Excellent written and verbal communication skills
